FEATURES

The type 202 transmitter is a very compact, yet extremely robust unit for use where regular use in aggressive environments is likely. It can be clipped to a belt or pocket, or to a suitable mounting bracket to allow use on board fork trucks etc. The IP54 rated case and ceramic pushbuttons mean that this is one of the most reliable units available for this type of operating environment. The unit can accept up to eight pushbuttons, depending on size, and custom layouts are available to order.
