FEATURES

The type 205 transmitter is a very robust IP65 sealed unit for use where prolonged operation in very aggressive environments is required. With up to eight pushbuttons, or six pushbuttons plus start and stop buttons, this unit can be used to control more complicated applications such as hoist, conveyor and ship loading systems. Its pistol grip design allows comfortable operation and the transmitter can also be fitted with a dual axis microswitch type joystick as shown.

Specifications for Cape 205 Transmitter
